THE LEARNERS HIVE

Issue 001: January - 2021

#lifelonglearners

THE WORLD IS EVOLVING, WHY ISN'T EDUCATION?

Our mission is to deliver

AN EDUCATION THAT TRULY MATTERS

We are a community of

Lifelong Learners

THE LEARNERS PHILOSOPHY

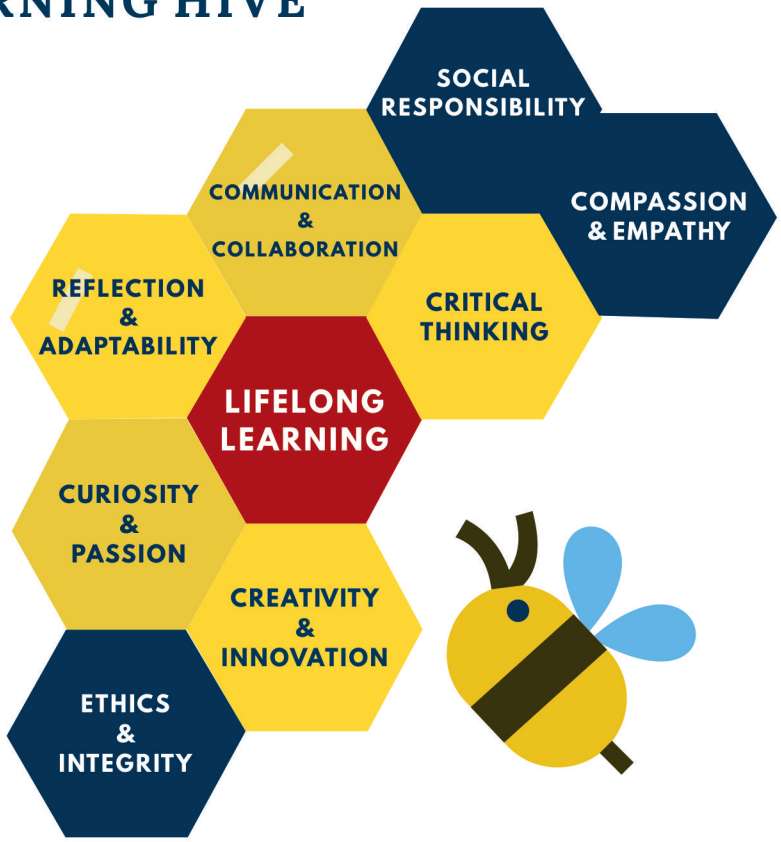
Conventional education systems have been the same for the past 200 years with their prime focus on memorising and reproducing information. For this new age, with artificial intelligence and automation taking centre stage, we need a renewed approach to education.

Learning can never be divided into place and time, i.e., to acquire knowledge at school and apply it at the workplace. Instead, learning is a lifelong process that goes beyond the school hours, years and space. Therefore, it is essential that children develop a learner's mindset that they can carry throughout their lives. This can be facilitated by nurturing curiosity, and inculcating skills and habits of thinking, questioning, doing, and learning at an early age.

Nurturing young minds to develop a life-long learners' mindset is the cornerstone of our philosophy.

At Learners, we aim to create not just a school but a community of dynamic learning enthusiasts - including children, parents and educators - that is compassionate, ethical, socially-responsible and environmentally - conscious.

THE LEARNING HIVE



An ever-evolving space, The Learning Hive mirrors a beehive in its foundation of life-long learning. A beehive is symbolic of many things - expression of creativity and curiosity, the spirit that supports industry and celebration of individuality - and it enriches a community with a sense of common purpose.

The eight facets of The Learning Hive throw light on the essential features of being human. At Learners, we strive to inculcate, nurture, preserve and strengthen the essence of life-long learning in our community and beyond.

As Aristotle said, true excellence, both intellectual and moral, comes through habit, habit comes through action, and action is driven through culture.

We aim to build on the innate capabilities one possesses, cultivating vital and diverse learnings that further enable a child to naturally develop a mindset of life-long learning.

LEARNING SPACES

It's often said, "We shape our buildings; thereafter, they shape us."

Rome was not built in a day: Our journey of designing a meaningful Infrastructure.

We are in the exciting stage of formation of the school where we can witness structures being built from scratch. It is fulfilling to see a blueprint manifested in the real, physical world- a place where dreams become tangible.

Four lovely classrooms have now come alive on the ground and first floor (based on the theme of earth and water, respectively) of the junior school.

It is a pleasure walking through the doors into the spacious rooms, well-lit with natural light and expansive windows.

Children who've visited our campus have expressed pure glee upon looking at our main playground, which is now ready to be trod upon by tiny feet.

Our splash pad - its watery domains offer boundless joy to our little learners! Our set of swings is every child's dream.

Our meticulously planned Dance Studio and the Art Studio, are almost ready! We can hardly wait for these promising spaces to be completed.

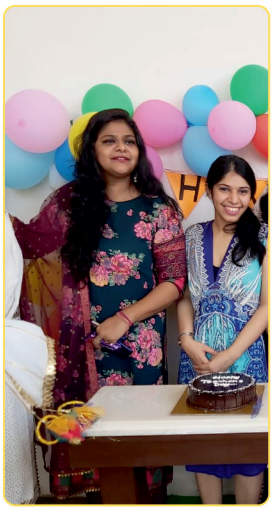
Meanwhile, the Math Lab and Library are also being built with unconventional design, into stimulating spaces.

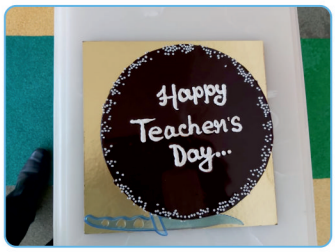
Our Welcome Walkway is part of our endeavour to make LIS a warm and welcoming place for our little ones, and is alive with engaging images and prompts.

LATEST EVENTS

TEACHER'S DAY (September 5, 2020)

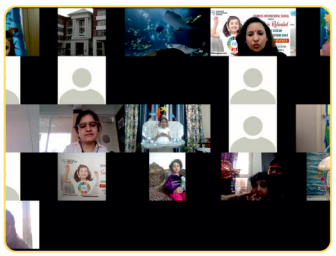
The team came together to engage in a cautious, distanced celebration which was still filled with fun and bonding activities. The day was replete with the good things in life- chocolates, music, laughter, good food and chatter.





SUSTAINIA RELOADED (October 17, 2020 - November 6, 2020)

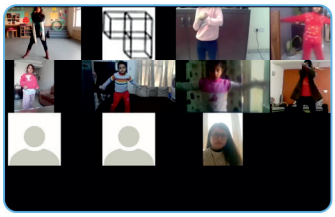
LIS organized an online fest to commemorate the 75th Anniversary of the United Nations and in continuation of its commitment towards the United Nations Sustainable Development Goals. It brought young learners from different schools onto a single platform to participate and showcase their involvement in UNSDGs through myriad activities.

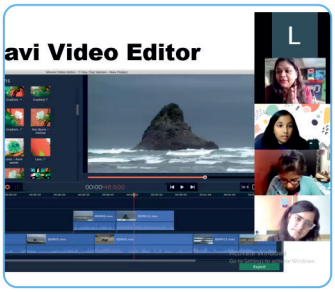


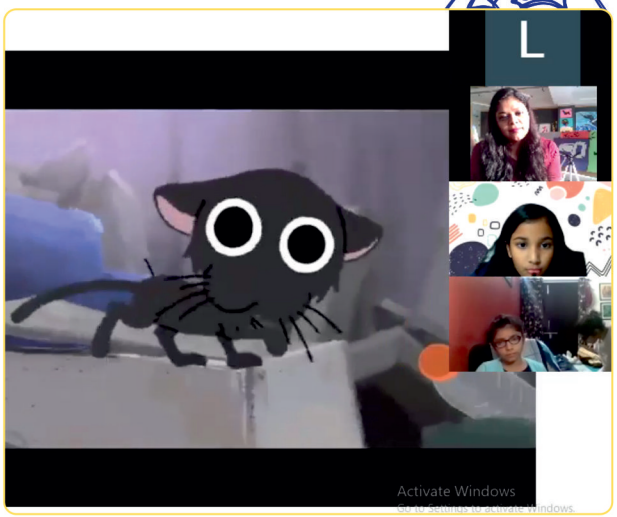
LATEST EVENTS

THE LEARNOPEDIA- SEASON 1 (December 5, 2020- December 18, 2020)

Learners International School undertook a series of interesting workshops for children (spanning across ages 4-14 years), parents and facilitators. The workshops included activities such as dance, filmmaking, storytelling and mindful listening.







CHRISTMAS CELEBRATIONS (December 24, 2020)

The Learners team came together to share and spread Christmas cheer, with games, cake, festive decorations and music!

COMMUNITY VOICES

Learnings from Young Learners

An interview with Amayra, Kriti and Abhiveer, tiny royal visitors to our school

How do you feel at LIS?

Amayra- I feel very good here.

Kriti- I love it, it's a beautiful place.

Abhiveer- Very, very, very good!

What do you love the most here?

Amayra- The play area (Mont. class)

Kriti– Me? I like Boishali didi.

Amayra- Oh- splash pad!

Abhiveer- Frog.

Who would you like to be when you grow up?

Amayra- A dancer!

Kriti- I want to be a dancer too!

Abhiveer- My papa. And I want to drive cars.

What is your favourite memory here?

Amayra - I loved doing all activities with Vandana ma'am. I also polished shoes that day!

Kriti - I loved jumping on the trampoline.

Abhiveer - Splash pad!

TALK FROM OUR TEAM

For this issue of our newsletter, we asked our facilitators the question: What is one quality that you'd most like to inculcate in a young learner?

VANDANA BHASIN
Independence

PRATITI JOSHI
Empathy

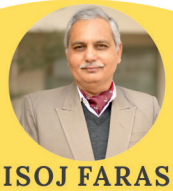
SHAMBHAVEE SHARMA
Self-love

SIMRAN DOGRA
Perceptive

MANISHA TRIVEDI
Compassion

DEEKSHA ARORA
Acceptance

ANJALI BASSI KAMPANI
Contentment



COL. DISOJ FARASHWAL
Empathy

SRESTHA TIWARI
Self worth

CONVERSATIONS FROM OUR COMMUNITY CIRCLES

It has been a wonderful Sunday spent at the learners international school, Greater Noida. Meeting and discussing and sharing the vision of the founding team has been an experience by itself.

The learners international school has been developed and conceived with the noblest of intentions.

The infrastructure and quality has come out to be amazing and thrilling, it is not merely building but the soul is unique.

My Best wishes for the success of the project and cause.

S. L. Jain (Former Chairperson, NPSE)

As an Architect it's an exhilarating feeling when the team's dreams turn into reality and the spaces are exactly as imagined.

The basic concept was to design a unique experiential learning environment which encourages creativity in a safe and secure way.

Anuj Mehta (Principal Architect)

PERSPECTIVES FROM PARENTS

I visited Learners International school. Amazed to see the education programme they've developed, supported by a vibrant culture that nurtures a sustainable mindset through thoughtfully designed campus and practices. Glad to admit my ward.

Radhika & Manu, Parents of Bharat (Chartered Accountants)

My daughter was so excited to visit the Montessori lab at Learners. She really enjoyed learning new concepts. The highlight of the school was the musical instruments brought from the Auroville sound garden which are installed all across the campus and help enhance the brain capabilities of a child.

She is so excited for the opening of the school.

Kanika & Prashant, Parents of Pavani (Chartered Accountants)
